LINCOLN ELEVATOR SKYROCKETING BRAND POWER

林肯电梯 扶摇直上的品牌力量

林肯电梯（中国）有限公司是由美国林肯电梯有限公司控股的中外合资企业，2008年入驻海宁尖山新区，工厂占地100余亩，建筑面积74000平方米，总投资3200万美元，注册资金贰亿零伍拾万元人民币，具有国家特种设备电梯类A级制造资质与A级安装改造维修资质。

通过合资引进、消化吸收、创新开发，林肯电梯完全实现了主要零部件的自主生产，建成了曳引机生产线、开门机生产线、控制系统生产线、轿厢生产线、自动喷涂生产线、激光切割机、机器人自动焊接线等国内外先进的电梯制造流水线，年生产能力20000台以上。试验塔高129.8米，内装10.0米/秒速度，1600Kg载重量的电梯。

林肯电梯采用高新技术结合精湛的制造工艺，不断追求制造高品质全系列电梯产品。其LC系列产品有乘客电梯、观光电梯、别墅电梯、医用电梯、载货电梯、杂物电梯、自动扶梯、自动人行道等，最大载重量5000kg，最高速度10.0米/秒。同时公司引进国外先进技术开发的节能电梯和太阳能电梯已获得国家专利。

作为领先的电（扶）梯供应商之一，林肯电梯拥有完善的质量保证与服务体系，始终把客户的权益放在第一位，承诺精细化每一个细节，只为客户创造完美乘梯享受。

LINCOLN
Essence of Lincoln
Brief introduction of company

林肯之本篇·公司简介

LINCOLN

PROFESSION CAST THE QUALITY Service Reflect The Value

Lincoln Elevator (China) Co., Ltd. is a sino-foreign joint venture enterprise, holding by Lincoln Elevator (America). Lincoln Elevator (China) entered in to Jianshan New District, Haining in 2008, covering an area of 100 acres and building area 74,000 m², with total investment capital \$ 32 million and register capital 200,500,000 Yuan. Also Lincoln elevator has obtained A-grade Manufacture License of Special Equipment and Installation, Alteration, Repair & Maintenance License of Special Equipment. Lincoln has completely realized independent manufacture of core elevator components by technology import, creation and development and built several advanced elevator production lines, such as traction machine, door operator, control system, car cabinet, automatic spray, laser cutting, robot welding and so on. Its annual production capacity is above 20,000 sets. Lincoln has a 129.8m high test tower, with a 10m/s, 1600KG elevator.

Lincoln applies high technology and excellent manufacture process and is constantly in pursuit of high quality elevator. LC series contains passenger elevator, panoramic elevator, villa elevator, hospital elevator, freight elevator, dumbwaiter lift, escalator, moving walk, of which the max capacity is 5000kg and max speed 10.0m/s. Meanwhile, Lincoln develops energy-saving elevator and solar energy elevator, both of which obtained national patent.

As one of the leading elevator (escalator) manufacture, Lincoln has perfect quality control and service system, always put customer in first and assure to refine every detail, only to create perfect ride enjoyment for customer.

129.8米
10米/秒

LINCOLN
Essence of Lincoln
Experimental tower

林肯之本篇·试验塔

林肯高度提升中国速度

LINCOLN

林肯电梯拥有高达 129.8 米的电梯试验塔，并内装 10.0 米 / 秒速度 1600Kg 载重量的电梯。这标志着林肯电梯已经拥有了领先行业的世界高度，并有能力实现超高速电梯运行的强大技术实力，将树立起林肯电梯大高度、大速度、大流量的运载领域新高度。

毗邻国家电梯产品质量监督检验中心(浙江)

国家电梯产品质量监督检验中心(浙江)12月10日落户浙江海宁，这个项目将建设成目前全球最高、检测功能全覆盖的高速电梯试验塔和国际先进水平的电梯电磁兼容实验室。

PROFESSION CAST THE QUALITY Service Reflect The Value

Lincoln elevator owns elevator experimental tower with height being 129.8 meters and elevator with speed of 10.0 meters per second and dead weight capacity of 1600Kg installed, which signifies that Lincoln elevator has owned leading height in the world with the ability to realize powerful technical strength of superspeed elevator operation, and will establish new height in carrying field of Lincoln elevator with great height, speed, and mass flow.

Adjoining with quality supervision and examination center of national elevator products (Zhejiang)
Quality supervision and examination center of national elevator products (Zhejiang) was settled in Haining, Zhejiang on 10th, December. The project will establish highest high-speed elevator experimental tower with examination function covering in the world and electromagnetic compatible experimental room with international advanced level.

INTELLIGENT CREATION BY NATURE FUNCTIONAL AREA WITH SCIENTIFIC ARRANGEMENT

CAST THE QUALITY
Service Reflect The Value

America has always been pronoun of innovative technology in the world, which has created many unimaginable miracles in the newly-emerging country, also changed the living trace of the world. Lincoln elevator stands on the shoulder of hundreds of scientific achievements, and creates many times of innovative revolution storms in Chinese elevator market with brave psychology and leading status, bringing to the world and this era with more surprises and expectation.

STRATEGIC ARRANGEMENT OF GLOBAL INDUSTRY

全球化产业战略布局

GREEN ROAD OF LINCOLN ELEVATOR

林肯电梯践行的绿色之道

节能电梯和太阳能电梯

林肯电梯秉承绿色环保理念，践行绿色环保之道，在节能电梯和太阳能电梯研发领域投入巨大的力量，并取得巨大成果，其自主研发的太阳能电梯和节能电梯已获得国家专利，在未来电梯竞争中占得先机，引领了行业发展方向。

Energy saving elevator and solar energy elevator
Lincoln elevator inherits green and environmental protection idea, puts the idea into practice, and invests great power into research and developmental field of energy saving elevator and solar elevator, occupying first chance in elevator competition in the future, directing industrial development.

太阳能电梯原理
Solar energy elevator principle

永磁同步无齿轮曳引机

林肯电梯主驱动采用更安全高效的永磁同步无齿轮曳引机，使传动效率提升 50%。同时采用碟式制动器，内含 8 颗强力制动弹簧，比传统制动器的制动力矩更大，吸合电流更小，机械故障率更低，安全性更高。

Permanent magnetic gearless machine
Lincoln elevator's masterdrive adopts safe and highly efficient permanent magnetic gearless machine, improving transmission efficiency by 50%, and adopts butterfly brake with eight strong tripping springs installed, which is larger than braking torque of traditional brake with smaller attracting current, low mechanical malfunction rate and high level of safety.

传动效率提升 50%

能量再生回馈技术

在电梯空载上行或者满载下行时，将马达产生的电能转化为同电网的相应正常电流，并将这些新产生的电流用于大楼其它用电设备上，实现实质性的节能效果，电能有效回收率高达 30%。

Energy regeneration and feedback technology
When the elevator is ascending with no load or descending with full load, transfer electric energy generated by motor into corresponding normal current of the same power grid and apply the newly generated current in other electric equipment of building, realizing practical energy saving effect with effect electricity recycling rate reaching 30%.

能量再生回馈技术
Energy regeneration and feedback technology

轿厢自动照明技术

充分考虑人性化和节能环保需求，应用自动照明技术，确保无人使用时照明灯处于关闭状态，节省电能；电梯启动时，照明设备自动开启，低耗运行，节约电能。

Automatic illumination technology of lift car
Consider sufficient humanization and energy saving as well as environmental protection with application of automatic illumination technology, ensuring that the lamp is in closed status when no one uses it with the purpose of electricity saving; when the elevator starts, illumination equipment starts automatically, with low consuming operation and electricity saving.

轿厢自动照明技术

CAST THE QUALITY**
Service Reflect The Value

SAFETY ROAD WELL-KNOWN IN LINCOLN ELEVATOR

林肯电梯深谙的安全之道

多碟安全制动器

曳引机采用多碟安全制动，即使其中一个制动器发生故障，电梯仍然可以可靠制停，使电梯运行更安全。

安全钳

当电梯超过标准限定速度时，通过限速器联动安全钳动作，确保电梯安全制停。

限速器

当电梯速度超过标准限定速度时，限速器动作切断电气安全回路保证电梯停止运行。

光幕门安全保护装置

采用红外线发生接收器，在电梯门口形成一幅红外保护网。不仅为电梯乘客提供最大限度的安全保障，而且增强了整个电梯系统的可靠性。

封门锁保护

电梯在检修或其他原因短接门锁回路时，控制系统会启动保护程序，阻止电梯运行，确保乘客安全。

防夹人安全系统

电梯关门时，门机控制系统自动检测电机力矩，力矩大于150N 时门机将自动反向开启，防止夹人。

曳引机封星技术

当电梯抱闸失效时，通过封星短路曳引机三相绕组，使电梯可靠制停。

缓冲器

采用液压式缓冲器，可以最大程度的吸收电梯非正常冲击能量，保护乘客安全。

轿厢意外移动保护装置

针对电梯层站停层时开门状态下开锁区内发生无指令移动的情况，林肯独创的轿厢意外移动保护装置，通过设置在井道内的检测装置发出检测信号给控制系统进而触发制动器动作使轿厢安全制停，保证乘客出入安全。

上行超速保护

当电梯上行的速度超过额定速度的1.2倍时，该装置自动将电梯减速或制停。

LINCOLN
Essence of Lincoln
Core technology

林肯之道·核心科技

PROFESSION CAST THE QUALITY Service Reflect The Value

Multi-disc safety brake : apply multi-disc safety brake. Even if one brake is in failure, elevator can also stop reliably and safely.

Safety gear: the speed governor coordinates the safety gear to ensure the elevator' s safe stop if the elevator' s speed is over the standard speed limit.

Speed governor: when the elevator' s speed is over the standard speed limit, the speed governor will cuts off the elevator' s safety circuit to make sure that the elevator stops operating.

Light curtain safety protection device: the infrared receiver with rays is applied to form an infrared protection network outside the elevator door, which enhances the reliability of the whole elevator system as well as provides passengers with maximum security assurance.

Lock sealing protection: when the elevator is being overhauled or short circuit happens due to other reasons, the control system will start protection procedure to stop the elevator from operating so as to ensure passengers' security.

Clamping resistance safety system: when the elevator door is closing, the door motor control system will test the torque automatically. If the torque is over 150N, the door will open in the reverse direction to prevent passengers from being clamped.

Short circuit technology of the traction machine: if the elevator brake fails, the elevator would stop reliably and safely thanks to the three-phase winding of the short circuit traction machine.

Buffer: hydraulic buffer is adopted to ensure passengers' safety by absorbing the elevator' s abnormal impact energy to the maximum degree.

Unintended car movement protection system: When unintended movement happens within the lock area when elevator stops at a certain floor. Lincoln unintended car movement protection system works. Detector in shaft sends signals to brake of control system and brake stops elevator safely. Thus passengers can go in or out safely.

Over speed protection while lifting: when the elevator is going up at a speed that is over 1.2 times faster than its nominal speed, this device will automatically slow down or stop the elevator.

INFORMATION ROAD PROMOTED BY LINCOLN ELEVATOR

林肯电梯倡导的信息之道

LINCOLN

物联网信息系统

林肯电梯采用先进传感技术采集电梯实时运行数据，通过微处理器进行数据分析、建模和建立故障专家库，经由多种传输方式（GPRS、RS485 以太网、CAN 总线）将数据传输到监视中心，实现电梯故障预警和报警、困人救援、日常管理、质量评估、隐患防范、风险评估、对标系统、节能技术开展等功能的综合性电梯管理平台。

PROFESSION CAST THE QUALITY Service Reflect The Value

Information system of Internet of Things
Lincoln elevator adopts advanced sensor technology to collect real-time operation data of elevator, makes data analysis, modeling and establish malfunction experts database through micro processor, and transmits data to monitoring center through many types of transmission methods (GPRS, RS485 Ethernet, CAN bus), realizing comprehensive elevator management platform integrating early malfunction warning and alarming, rescue of trapped passengers, daily management, quality evaluation, potential danger prevention, risk evaluation, benchmarking system, and energy saving technology development and so on.
